

## ➔ Input Tag Examples ➔

The screenshot shows a web browser window with the following elements:

- Address bar: 127.0.0.1:5500/tut\_8\_InputTag.html
- Page content:
  - Button Input :
  - Text Input :
  - Checkbox Input: ☒
  - Email Input :
  - Password Input :

- The input tag in the html is used for taking input from the user.
- There are different types of input tag such as button , submit , checkbox , email , password etc. there are plenty more.
- Here some of them are used
- Input tag mostly used in the forms and login forms etc.
- `<input type ="text" >`
- This is the syntax , as above it don't have closing tag
